CHARLES RIVER'S QUALITY CONTROL PRODUCTS HELP GIVE YOU EVERYTHING YOU WOULD EXPECT.

When achieving pregnancy is the bottom line, accurate quality control testing is absolutely crucial. It can mean the difference between success or failure. And that's why our CRYOTECH™ Straws for hamster ova and mouse embryos were developed — to help you succeed.

Today, the CRYOTECH Straw is the finest testing method available to help you achieve the highest possible pregnancy rates. It is also the most convenient and easy-to-use method.

The CRYOTECH Straw eliminates the need to maintain an animal colony. The Straws contain either 15 frozen hamster ova or 10 frozen mouse embryos, which can be ready to use in 7 minutes. Testing has confirmed that unused Straws can be stored indefinitely.

In short, the CRYOTECH Straw gives you the level of quality control you need for consistent success. The same uncompromising quality the research community has come to expect from Charles River.

For descriptive product literature or to place your order, call our sales agent Fertility Technologies at (800) 368-8324.

Charles River's CRYOTECH Straw — the results speak for themselves.

Superb new SECOND Edition!
The book you need in today's medical practice
**TEXTBOOK OF
 INTERNAL MEDICINE**
Second Edition • William N. Kelley, MD, Editor-in-Chief
 10 Section Editors • 528 Contributors

An indispensable resource

Since its first publication in 1989, the TEXTBOOK has been hailed for its practical organization, depth and scope of coverage, and clarity of expression. The editors and contributors constitute a virtual Who's Who of internal medicine—the established authorities and the rising stars.

Reflects today's medicine...with more coverage of all your concerns...with special emphasis on Geriatrics and Oncology

Every chapter in the Second Edition has been updated significantly to reflect important advances. More than 20% of the material is entirely new or totally rewritten. The TEXTBOOK brings you MORE detailed information on the scientific basis of disease, and many more chapters on diagnosis and management—the practical handling of clinical problems—PLUS encyclopedic disease descriptions.

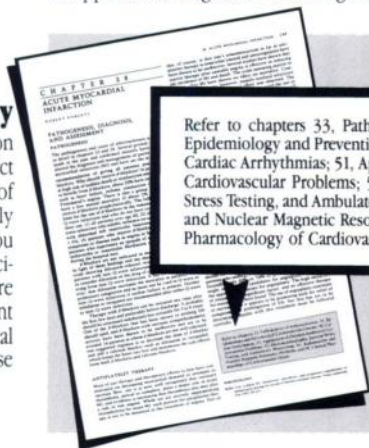

NEW in the Second Edition

- each chapter significantly updated
- more than 20% new material
- 150 new contributors
- new cross-referencing system
- dozens of new photographs, tables, charts, diagrams

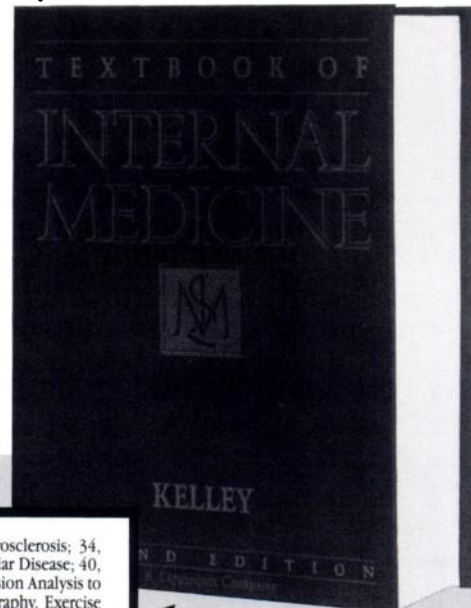

A unique new cross-referencing system helps you find what you need faster

Like no other text, the TEXTBOOK emphasizes time-effective differential diagnosis and cost-effective care. Each major section is divided into three parts to help you find the information you want quickly and easily:

- Pathophysiology
- Description of disease entities
- Approach to diagnosis and management

Refer to chapters 33, Pathogenesis of Atherosclerosis; 34, Epidemiology and Prevention of Cardiovascular Disease; 40, Cardiac Arrhythmias; 51, Application of Decision Analysis to Cardiovascular Problems; 53, Electrocardiography, Exercise Stress Testing, and Ambulatory Monitoring; 55, Radionuclide and Nuclear Magnetic Resonance Methods; and 58, Clinical Pharmacology of Cardiovascular Drugs.

← Extraordinarily efficient cross referencing in all chapters PLUS a "road map" at the end of each chapter lead you to the information you need in all situations.

2,688 Pages. 524 Chapters. 586 Illustrations.
 60 Color Plates. 143 Tables. Second Edition, 1992.
 One-volume Edition (ISBN-0-397-51048-9) \$ 99.00
 Two-volume Edition (ISBN-0-397-51037-3) \$125.00

Fresh, pragmatic, comprehensive, up-to-date, the TEXTBOOK is a major resource for hard-pressed physicians.

Official Journal
 of the Southern
 Society for
 Clinical Investigation

Suzanne Oparil, Editor

Significant investigations

The American Journal of the Medical Sciences publishes, every month, original articles on clinical and laboratory investigations covering all of the ten traditional subspecialties of internal medicine. All articles are peer reviewed, assuring quality and significance of content. Emphasis is on rapid dissemination of new developments.

Wide-ranging scope

Contents include clinically relevant recent research findings, the latest in medical technology, updated developments in the knowledge and treatment of diseases, informative case reports, and innovative

approaches to treatment problems. Recent articles have contributed to the areas of:

- endocrinology / metabolism
- pulmonary / respiratory medicine
- infectious diseases
- hematology / oncology
- cardiology
- hypertension
- renal disease
- rheumatology
- musculoskeletal problems
- pathology
- genetics
- pediatrics
- nutrition
- neurology
- forensic medicine
- gastroenterology
- dermatology
- genitourinary conditions
