

# Semen

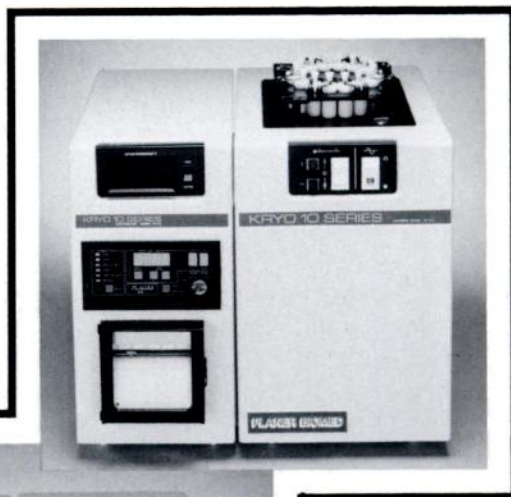

## Preservation and Analysis

### Controlled Rate Freezer

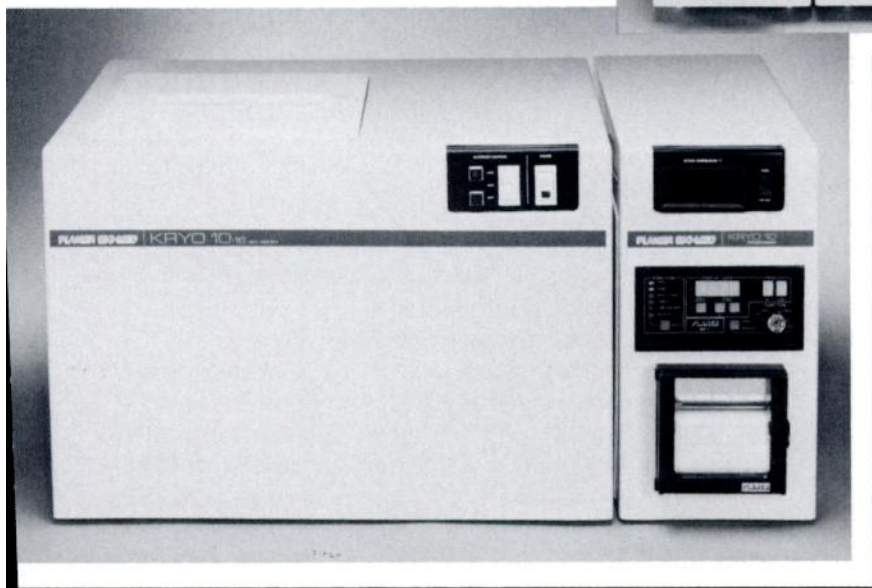

Discover the advantages of controlled rate freezing in your semen and embryo preservation programs.

### PLANAR KRYO 10 Series Freezers provide

- Maximum post thaw viability
- Ease of sample handling
- Reliability and repeatability

*The KRYO 10 is microprocessor controlled and features fully automatic seeding. Super cooling and latent heat problems have been virtually eliminated by the latest Auto-Seeding unit and results show remarkable improvement in post thaw viability using this convenient bench top unit.*

### Automatic Semen Analyzer

The TS Scientific Sperm Motility Analyzer and Patient Data Base provides the results you want in the format you want. Capable of measuring in real time at up to 30 frames per second, this system rapidly converts raw data into simple, clinical terms with high accuracy and repeatability.

*Featuring a modular, compact cabinet with side access panels and an integral chart recorder, The KRYO 10 has been carefully and economically designed for ease of use. Straws can be handled horizontally or vertically and different chamber sizes are available for freezing small or large quantities of samples in vials or straws.*

For immediate details about these exceptional products and our complete line of IVF and semen bank laboratory supplies, please call (215) 257-4756.

## Significant investigations

The American Journal of the Medical Sciences publishes, every month, original articles on clinical and laboratory investigations covering all of the ten traditional subspecialties of internal medicine. All articles are peer reviewed, assuring quality and significance of content. Emphasis is on rapid dissemination of new developments.

## Wide-ranging scope

Contents include clinically relevant recent research findings, the latest in medical technology, updated developments in the knowledge and treatment of diseases, informative case reports, and innovative

approaches to treatment problems. Recent articles have contributed to the areas of:

- endocrinology / metabolism
- pulmonary / respiratory medicine
- infectious diseases
- hematology / oncology
- cardiology
- hypertension
- renal disease
- rheumatology
- musculoskeletal problems
- pathology
- genetics
- pediatrics
- nutrition
- neurology
- forensic medicine
- gastroenterology
- dermatology
- genitourinary conditions
