JANUARY/FEBRUARY

Number 1

CONTENTS

Functional Aspects of Human Sperm Binding to the Zona Pellucida Using the Hemizona Assay / C. C. Coddington, D. R. Franken, L. J. Burkman, W. T. Oosthuizen, T. Kruger, G. D. Hodgen	1
Rat Tumor Leydig Cells as a Test System for the Study of Sertoli Cell Factors That Stimulate Steroidogenesis / G. Verhoeven, J. Cailleau	9
2,5-Hexanedione Exposure in the Rat Results in Long-Term Testicular Atrophy Despite the Presence of Residual Spermatogonia / K. Boekelheide, S. J. Hall	18
Specific Regulatory Actions of Dihydrotestosterone and Estradiol on the Dynamics of FSH Secretion and Clearance in Humans / R. J. Urban, K. D. Dahl, V. Padmanabhan, I. Z. Beitins, J. D. Veldhuis	27
Teratospermia in Domestic Cats Compromises Penetration of Zona-Free Hamster Ova and Cat Zonae Pellucidae / J. Howard, M. Bush, D. E. Wildt	36
Response of Circulating Gonadotropin Levels to GnRH Agonist Treatment in Prostatic Cancer / I. Huhtaniemi, P. Venho, G. Jacobi, S. Rannikko	46
Correlation of Sperm Motion Parameters with Fertility in Rats Treated Subchronically with Epichlorohydrin / G. P. Toth, J. A. Stober, H. Zenick, E. J. Read, S. A. Christ, M. K. Smith	54
Effect of Phorbol Diesters, Synthetic Diacylglycerols, and a Protein Kinase C Inhibitor on the Human Sperm Acrosome Reaction / C. J. De Jonge, H-L. Han, S. R. Mack, L. J. D. Zaneveld	62
Non-Poisson Distribution of Sperm from Grandfathers in Zona-Free Hamster Ova / M. T. Zenzes, T. E. Reed, E. Nieschlag	71
Correlation Between Changes in Rat Sperm Membrane Lipids, Protein, and the Membrane Physical State During Epididymal Maturation / J. C. Hall, J. Hadley, T. Doman	76

Announcements

11th Testis Workshop	35
Notice to Copiers.....	70
1991 Meeting—Society for the Study of Reproduction	75
Symposium of Operative Andrology ...	87

American Society of Andrology

1991 Annual Meeting	8
Future Annual Meetings.....	17
Placement Service	45
Postgraduate Courses.....	53

Cover: Two halves of a human ovum (hemizona assay) demonstrating high binding of spermatozoa from fertile men (left panel) and low binding of spermatozoa from subfertile men (right panel), original magnification $\times 200$. See article by Coddington et al.
