Thematic Reviews: Cell—Cell Interaction

- Androgen Regulation of Programmed Death of Normal and Malignant Prostatic Cells** / J. T. Isaacs, P. I. Lundmo, R. Berges, P. Martikainen, N. Kyprianou, H. F. English 457
- Normal and Abnormal Development of the Male Urogenital Tract: Role of Androgens, Mesenchymal—Epithelial Interactions, and Growth Factors** / G. R. Cunha, E. T. Alarid, T. Turner, A. A. Donjacour, E. L. Boutin, B. A. Foster 465
- Role of Nerve Growth Factor-like Protein in the Paracrine Regulation of Prostate Growth** / D. Djakiew 476

Original Articles

- Sperm Surface Proteins After Capacitation: Expression of Vitronectin on the Spermatozoan Head and Laminin on the Sperm Tail** / F. M. Fusi, I. Lorenzetti, M. Vignali, R. A. Bronson 488
- Measurement of Human Sperm Intracellular Water Volume by Electron Spin Resonance** / F. W. Kleinhans, V. S. Travis, J. Du, P. M. Villines, K. E. Colvin, J. K. Critser 498
- Acute and Long-term Effects of a Single Dose of the Fungicide Carbendazim (Methyl 2-Benzimidazole Carbamate) on the Male Reproductive System in the Rat** / M. Nakai, R. A. Hess, B. J. Moore, R. F. Gutoff, L. F. Strader, R. E. Linder 507
- Effect of Fucoidin on Human Sperm—Zona Pellucida Interactions** / S. Oehninger, G. F. Clark, D. Fulgham, P. F. Blackmore, M. C. Mahony, A. A. Acosta, G. D. Hodgen 519
- Differential Regulation in the Release of Bioactive Versus Immunoactive Gonadotropins from Cultured Rat Pituitary Cells by Inhibin and Androgens** / K. D. Dahl, C. A. Campen, D. M. McGuinness, W. Vale 526
- Androgen-induced Prevention of the Outgrowth of Cranial Gonadal Suspensory Ligaments in Fetal Rats** / P. van der Schoot, W. Elger 534
- Dose-Response Effects of Gonadotropin-releasing Hormone on Plasma Concentrations of Gonadotropins and Testosterone in Fertile and Subfertile Stallions** / J. F. Roser, J. P. Hughes 543

continued on next page

Cover: Schematic model of paracrine interactions between stromal and epithelial cells in the human prostate. Stromal cells release nerve growth factor-like protein that binds to a putative surface receptor complex of an adjacent epithelial cell (see review by Djakiew et al).

The Human Sperm Acrosome Reaction Does Not Depend on Arachidonic Acid Metabolism via the Cyclooxygenase and Lipoxygenase Pathways / S. R. Mack, H.-L. Han, C. J. De Jonge, R. A. Anderson, L. J. D. Zaneveld	551
Ultrastructure of Adult and Juvenile Marmoset (<i>Callithrix jacchus</i>) Sertoli Cells In Vivo and In Vitro / G. M. Rune, D. Pretzer, P. De Souza, U. Bollmann, H.-J. Merker	560
Human Sperm Acrosin: Further Studies with the Clinical Assay and Activity in a Group of Presumably Fertile Men / J. Blackwell, J. M. Kaminski, P. Bielfeld, S. R. Mack, L. J. D. Zaneveld	571
Modulation of Immunoradiometric and Bioactive Follicle Stimulating Hormone Secretion and Clearance in Young and Elderly Men During Treatment with Tamoxifen or Flutamide / R. J. Urban, K. D. Dahl, M. C. Lippert, J. D. Veldhuis	579
 Perspectives	
Min Chueh Chang: Experimentalist for Whom Perseverance, Cognitive Planning, and the Favoring Winds of Chance Paid Off / R. O. Greep	587

Errata

The editors of the Journal of Andrology regret that an error was made in the abbreviated title of an article featured on the cover of the September/October issue. The correct title, drawn from a paper by Dr. J. M. Bedford and Dr. R. Yanagimachi, is *Hamster Sperm Motility is Stimulated by Oviduct Fluid*.

The caption for the photomicrograph that appeared on the cover of the July/August issue should read:

Electron micrograph of an elongated spermatid from a mouse homozygous for the oligotriche gene mutation. The tail is absent but nuclear condensation and acrosome formation appear to be normal. The manchette is also observable (magnification = ×5,000). Electron micrograph courtesy of Janet Folmer. See article by Chubb.
